Shal Jacobovitz

*The mission of the American College
of Cardiology and the American
College of Cardiology Foundation
is to transform cardiovascular care
and improve heart health.*

April 15, 2016

To Whom It May Concern:

The American College of Cardiology is leading the way to optimal cardiovascular care and disease prevention. The College is a 52,000-member nonprofit medical society and bestows the credential Fellow of the American College of Cardiology (FACC) upon physicians who meet its stringent qualifications. The College is a leader in the formulation of health policy, standards and guidelines, and is a staunch supporter of cardiovascular research. The ACC provides professional education and operates national registries for the measurement and improvement of quality care.

The Annual Scientific Session & Expo is a three-day cardiovascular continuing education program presented by world-renowned faculty, and features one of the world's largest expositions of cardiovascular products and services. It has no retail or commercial purpose and is a not-for-profit professional education activity. For more information, please visit:
<http://accscientificsession.acc.org>.

The Annual Scientific Session & Expo is the premier conference in the field of Cardiology attended by more than 15,000 professionals including physicians and scientists from all over the world. We receive more than 4,000 abstracts every year and after undergoing a vigorous selection process performed by experts in the field, only the very best abstracts are selected for presentation.

The meeting significantly changes the practice of medical care for physicians and patients around the world. Submissions selected for presentation at the ACC annual meeting have global impact with more than 300 media members from around the world with more than 1.5 billion media impressions. The meeting focuses on cutting-edge science and innovations in the field of cardiology, lifelong learning and practice improvement and reflects passion for education and peer-to-peer networking. Abstracts selected are published in the online version of the *Journal of the American College of Cardiology (JACC)*, which has a very high impact factor.

I am writing this letter on behalf of Dr. Maria Cristina Lorenzo Carrion, who submitted and presented the following abstract at the American College of Cardiology's 65th Annual Scientific Session, held in Chicago, IL, April 2-4, 2016:

Utility of an Adherence Test to Predict the Percent Time in Therapeutic Range of Patients Anticoagulated With Dicumarinic Anticoagulants. Maria Cristina Lorenzo Carrion, Fernando Sogn, Gustavo Allende, German Jelusic, Gerardo Accastello, Jorge Tronche, Roxana Palacios, David L. Xavier, Clinica IMA, Buenos Aires, Argentina.

Best regards,

Robin Young
